Holding the Balance of Cosmic Forces in the Earth

The Relentless Wave of Light

I AM the light of the God Star unto elemental life and for the holding of the balance of cosmic forces in earth in this cycle of the coming of the relentless wave.

From out the Great Central Sun, emissaries of light descend. We come, then, to address the elect body of God, who have chosen an election well, to be present in the very midst of the LORD's visitation. It is the visitation of the I AM THAT I AM in the very person of your own I AM Presence. For his is the promise unto those who believe on his name, that the Father and the Son will dwell *with* them and *in* them.¹

Therefore I AM come, for I give testimony as one in whom the Law has been fulfilled. With my legions, I number among the hosts of the LORD, an army of God assigned to the tending of elemental life and the uses of nuclear energy in the earth and of the one hundred and forty and four elements.

I come as I hold the balance of the flow through the four quadrants of Spirit and Matter as there is the transition from fire to air, air to water, water to earth, and then earth recycling back to the fiery core for that recharging, coming forth once again as earth that becomes fire.

There is an interchange between all of the elements, depending on the cycles present, as the figure-eight flow from fire to water and water to fire, earth to air and air to earth. Thus the cosmic interchange of God the Father through God the Son unto God the Holy Spirit manifests in earth as in heaven. So, this is the light that also courses through your four lower bodies, your chakras, and your temples.

The most magnificent point of the Law, which is the point of our adoration of the only begotten Son, is our awe before the great transfer of light from God to earth and to his sons and daughters. Thus, we keep the flame for the interaction of light and consciousness as these form a grid of light, an antahkarana for each galaxy, and then the antahkarana connecting all galaxies with the Great Central Sun.

The hand of the weaver, of the one who crochets, the one who then creates the designs of thread or string or lines with a compass—this one celebrates the interaction of energy by the lines of force, which lines are always personified by angelic beings and elementals of fire, air, water, and earth.

The Cosmic Science Whereby God Begins to Infuse Life

So we come. For in the hour of the acceleration of your quest for the resurrection, you must pause a moment and consider the cosmic science whereby God begins to infuse life—life in the person of yourselves, life as the rock, the earth, the water, the fiery star.

As God commences, then, the infusion of life as you know it with the resurrection flame, which called Christ out of the tomb—the flame whereby he recalled the threefold flame to the physical temple—as this process of personal and planetary initiation begins because there is the guru-chela relationship intact, you must realize that once the resurrection spiral begins to accelerate in you and in Matter, there is no turning back of that spiral. It *is* the relentless wave!

Once released, it is oncoming, all-consuming, all-elevating!

This is the meaning for the prophecy of the resurrection in the righteous and the unrighteous. Karma is resurrected, both good and bad. And thus there is an acceleration that is taking place.

Energy Must Pass through the Great Transformer of the Mind of God

I come to anoint you who would be anointed as guardians of the resurrection of all life, in the name of Jesus Christ and the one who sent him.² Guardians of the flame, Keepers of the Flame you are.

Now understand that for the safe and sound harmonious transition of life in its present discordant and degenerate state to life in its harmonious and regenerate state, there is required the focal point that is called the nexus of the Mediator. That nexus is the person of the universal Christ made personal to you in Jesus, made personal to you in every ascended master and in your own Christ Self.

In order for discord to become harmony and for degeneration to become regeneration, energy must pass through the great transformer of the mind of God. And within that transformer are many rays. It is *the washing*—the washing of the body of God by the blood of the Lamb,³ the very fiery baptism of the Lamb. As that Lamb is represented in the entire chain of hierarchy unto the messenger and unto its extensions in the chelas, thus you become, in this period of transition, miniature replicas of the great transformer.

You stand between the old order and the new order, between death and life. And you have been given the where-withal to summon the life that is God out of the prison house of death in which mankind have attempted to seal him forever. But he will *not* be sealed. He will come forth from that tomb and live forever in you—electron by electron,

elemental by elemental, imprisoned angel by imprisoned angel. This is the great march of the electrons! This is the great procession of worlds!

The Summoning of the Return of All Life to the Aum

Oh, do you not see the vastness of stellar hierarchies, themselves focal points of the great transformer of the mind of God and being the instrument for the transformation of worlds and worlds of energy misused, which now become requalified as they pass through that nexus that is as thin, as fine as the nexus of an hourglass, where a single grain of sand may pass through, but no more?

And the single grain of sand becomes the challenge of the moment and of the hour. It may be a boulder of pride. It may be an international intrigue. It may be a mountain as obstacle to the incoming golden age. It may be an approaching dark star or a speck of doubt on an otherwise crystal chalice. Whatever the grain of sand, it belongs to God. It is God's energy.

Elohim have sent forth the call! Therefore, I AM here to translate the call to you of Elohim. For by the command of the living Word, by the command of the LORD God, Elohim have sent forth the call, the great summoning of the return of all life and every particle of life to the Aum, worlds without end.

Each particle that shall return and retain its identity must pass through the open door of the Christ, the nexus of the heart. Therefore, we begin the summoning of unascended chelas to play the role of holding the Electronic Presence of Surya and of myself, which I now add to his own.⁴

And therefore as guru and chela, we come to you offering our own figure-eight flow and connection as the love-emanation, as our own two forcefields where you are, making you then the instruments of that translation, which is

occurring daily in our retreat and through our own heart chakras. Our reinforcement of your vehicles and your chakras will be accomplished as you make the call for our Electronic Presence to be placed over your own.

The Control of Nuclear Energy by Decrees and Attunement with Your Own Nucleus of Being

So we come that you might know that aside from the normal course of acceleration of a world of materialistic decay to a world of spiritual enlightenment, there are upon this planetary body, as you have seen, irresponsible individuals, grossly selfish and in lust for power, misusing nuclear energy. This energy is also God's. No matter how great or how intense, this energy is yet controllable by the Cosmic Christ Maitreya, by the devotee and Cosmic Christ, Jesus the Lord, and by the Christ within you.

Thus, you must not stand aghast at the immensity of the challenge that this possibility [of the misuse of nuclear energy] brings. I speak of the possibility of various laggard elements throughout the earth and even in this nation, who do not have a proper regard for life, for the path of initiation, or for the earth as holy ground for the children of God.

And thus we require a body of God who understands that by the sacred call to the cosmic forces four and to the hierarchs of the elements, this too can be contained, this too can be sealed, and every evil design set back and bound according to the gift given to the apostles,⁵ and sealed that it may not be used to interrupt planetary life and its evolution.

When you understand how much is required of dynamic decrees to turn the tide of a personal problem or a community problem or an issue of the nation, you may have some co-measurement to understand that dynamic decrees for the control of the unbridled use of nuclear energy⁶ must have not merely an extension of time but, most importantly,

an intensification of your own attunement with your own nucleus of being. I speak of your I AM Presence.

God does not require lengthy [decree] sessions but attunement and a deep inner contact of his Presence. This, then, combined with adequate time and space for the giving of the dynamic decrees, will result in the God-control of life becoming a part of your very being within your very own beating heart.

It is our desire, then, that you shall reach for a closer walk with the person of Jesus Christ, the ascended masters, with Mother Mary, and that you shall acquaint yourselves as much as possible with our own work in the holding of the balance of the physical cycles of the earth.

We desire an intimate communion with God on the part of every chela. For in the Great Central Sun of your own being is the place where you understand a stupendous love that makes of a nuclear weapon or power plant or reactor but a grain of sand that also must pass through the transformer.

Beloved ones, come now in my own inbreath, and come with me into the great inbreath of Elohim.

[Cuzco chants:]

Elohim

Elohim

Almighty God, I stand before thee on behalf of these souls of light so filled with the love of thy Holy Spirit. I stand before thee, summoned by thy name, sent by thy flame, a courier of light to bear the message of the real key of the inner science of the age.

Almighty God in the person of the seven Elohim, I bow before thy seven rays. I bow before thy resurrection flame. I kneel upon the shore of life, before the oncoming relentless wave of light.

In the name of the only begotten Son—thy Word,

O God—I, Cuzco, salute thee and I implore thy transfer of thyself, myself, and the Self of my Guru, Surya, unto these waiting hearts, worthy hearts who would understand and become the answer to the call of humanity for a staying action of destruction through the abuses of nuclear energy.

Let there then be, by these heart flames, a purification of air, earth, and water by the fiery element, by the sacred fire of Cuzco, of Surya, of Zarathustra, of the priesthood of the Order of Melchizedek, of Enoch, of all beings of fire.

O Oromasis and Diana, let the mighty fiery salamanders go forth by thy name, by the accord of these souls of light. Let them go forth now for the purging, for the realignment, for the burning up, then, of those harmful substances that have been burdening the body of the earth since the irresponsible uses of nuclear energy, even on Atlantis.

Therefore, let the light of the resurrection meet the sun of even pressure in the heart of the earth as I, Cuzco, stand with these initiates of the sacred fire for the translation of light, for the transfer of light, and for the bringing of the earth into greater alignment with the etheric blueprint for the opening up of those places in the earth that have been sealed because of the destructive elements present beneath the surface of the earth. And let it be for the opening of the temple doors and the opening of the etheric retreats. For all people of God await thy coming, LORD.

By thy flame, by thy chalice, by thy love, and by thy ruby cube, I stand on the earth. I stand on Mu. I stand in the Chapel of the Holy Grail. Now let ascended masters come and walk and talk with chelas in this blessed place.

I AM Cuzco, and I bow before the light of each and every one. I await the day of the light in you becoming *the fullness of itself!*

I AM THAT I AM! [Applause]

(4) Cuzco, a cosmic being from Sirius, is a disciple of Surya and director of Surya’s etheric retreat of God’s will near Suva, the Sacred Retreat of the Blue Flame. This retreat is described in *The Masters and Their Retreats* as being “in an island northeast of Viti Levu (the largest of the Fiji Islands) and is both under the sea and within the mountains. For many centuries, Cuzco has served under beloved Surya to avert or temper cataclysmic activities. His mighty balancing power of peace, his advice to us to follow the wisdom offered by the Great White Brotherhood, and his divine love are radiant gifts to all mankind. Cuzco’s retreat is dedicated to the holding of the balance of forces in the earth, to the adjustment of the earth to the weight of karmic effluvia, and to the guarding of the earth on its axis and in orbit. Ascended masters who serve with Cuzco at his retreat use advanced technology, including computers and scientific instruments. For millennia, the axis of the earth has been tilted at a considerable angle due to the great weight of human discord of the planet’s evolutions. . . . Cuzco is concerned with the riptides of anger, hate, fear, frustration, confusion, derision, gossip, and many other momentums of psychic forces that rush headlong against the lifestreams of unascended beings. He has given a ‘Count-to-Nine Decree’ by which the individual may protect his four lower bodies against the bombardments of these astral riptides.” See decree 0.10 in *Prayers, Meditations and Dynamic Decrees for Personal and World Transformation*, p. 19.
